# INTENSIVE HOLIDAY REVISION COURSES

These highly focused and structured revision courses are perfect for ensuring students get on top of their revision over the holiday period.

The courses provide structured revision content, ensuring all course information is effectively revised and supplemented with sample exam questions.

Each session includes access to locked past exam papers and enables students to explore fully model answers as well as providing essential tips to help up-level their answers to ensure improved grades.

# POWER FULL MEMORY SKILLS

[www.heatherharries.com](http://www.heatherharries.com)

To master anything we must truly understand the process. Learning for years and just randomly throwing information into our brains is not an effective way of learning efficiently.

Efficient learning = finding the answer easily.

If you learn in the correct way, the memory retrieval is a more automated process, ensuring exam success.

**See Exam  
grades  
improve**

Once your child masters memory and recall there is no limit to the success that they can achieve.

Do your children constantly complain that they just can't remember what they need to learn. Is it all getting too much, or put simply, do they not know how to start learning everything for exams? Our certified trainer has developed a unique brain training memory course developing **powerful memory skills**. Today, he is ready to share these skills with students enabling them to memorize long chunks of text, vocabulary words, meanings, and definitions.

Of all the skills we need, having a good memory is perhaps the most essential. Just imagine if your child can remember day to day tasks improving their ability to organize themselves and streamline their learning skills for life.

**DATES: 800 aed per course**  
**Sunday - December 12th @ 11am**  
**Wednesday - December 15th @ 4pm**
